

1.0 Term 4 MHS EduSTAR Wi-Fi On boarding Guide

Over the school holidays we have implemented a new system for connecting to the school's Wi-Fi Network called Clearpass. Initially this will simply connect you to the school network. Next year with the introduction of BYOD this device will also ensure you have the mandatory antivirus software installed on your device (Windows / Mac / iPad) before letting you onto the school network. This software item will appear on the 2017 booklist for you to purchase.

This short guide will show you how to get connected to the MHS EduSTAR Wi-Fi network.

1.1 On boarding summary:

Section 2 – iPad Instructions

- Disconnect your iPad from the “old” EduSTAR Wi-Fi
- Connect your iPad to the “new” EduSTAR Wi-Fi

Section 3 – Windows Instructions (windows 8 & 10)

- Disconnect your windows device from the “old” EduSTAR Wi-Fi
- Connect your windows device to the “new” EduSTAR Wi-Fi

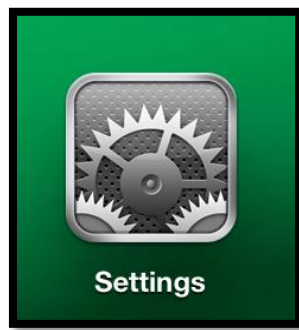

Section 4 – Mac OSX

- When Prompted Update your existing Wi-Fi Connection certificate (yes that is all there is) by entering your Mac Admin ID and password

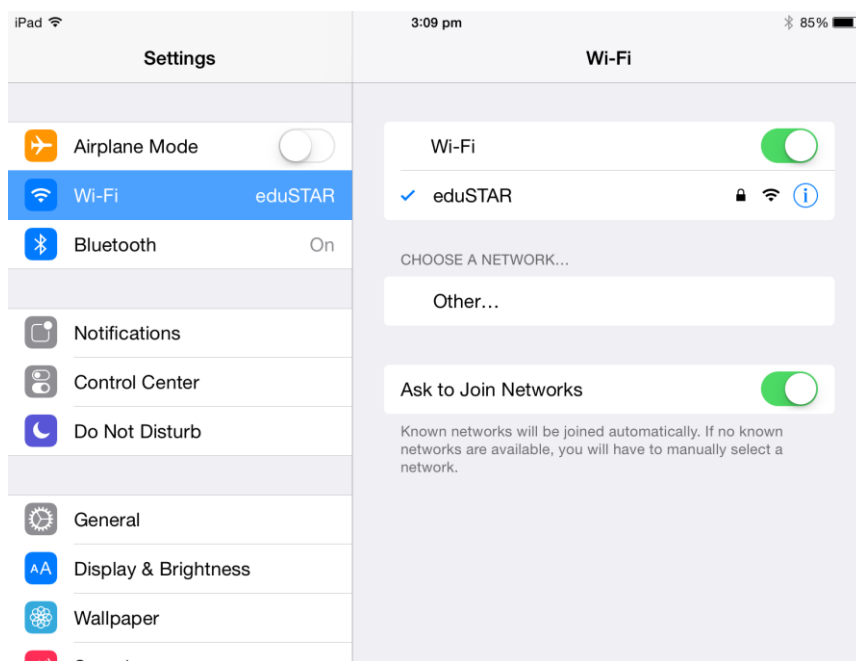

2.0 Connect your iPad to the new MHS EduSTAR Wi-Fi Network

2.1 Step 1 - Remove the old EduSTAR Wi-Fi network setup

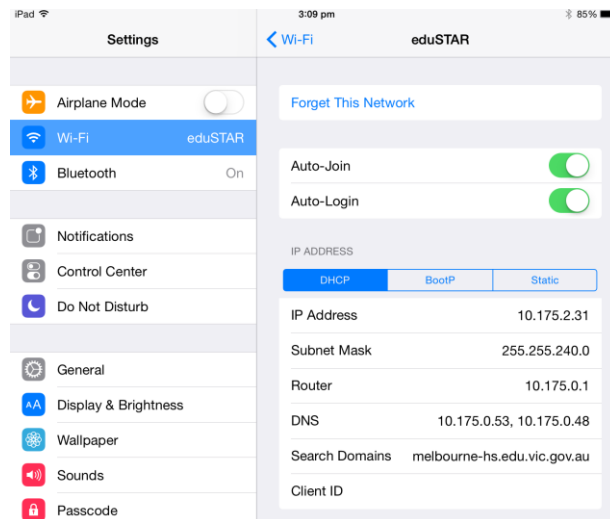

- Click Settings.

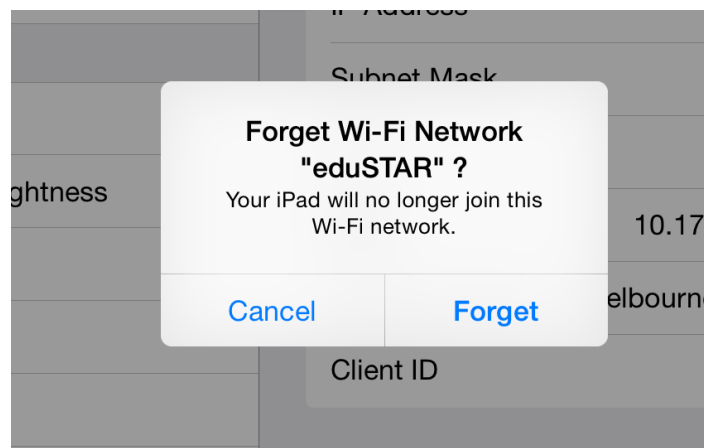

- Select Wi-Fi.
- Click the **i** Icon.

- Click the 'Forget this network' text.

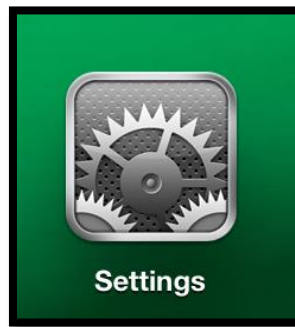

- Click the 'Forget' confirmation.

2.2 Step 2 - Reconnect your iPad

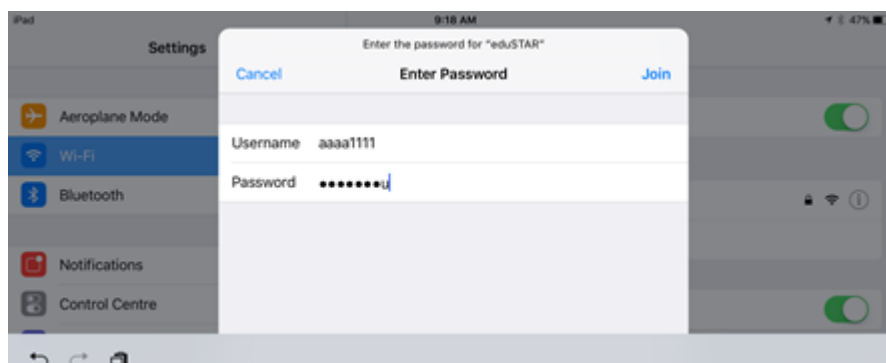

- Select the 'Settings' option from your home screen.

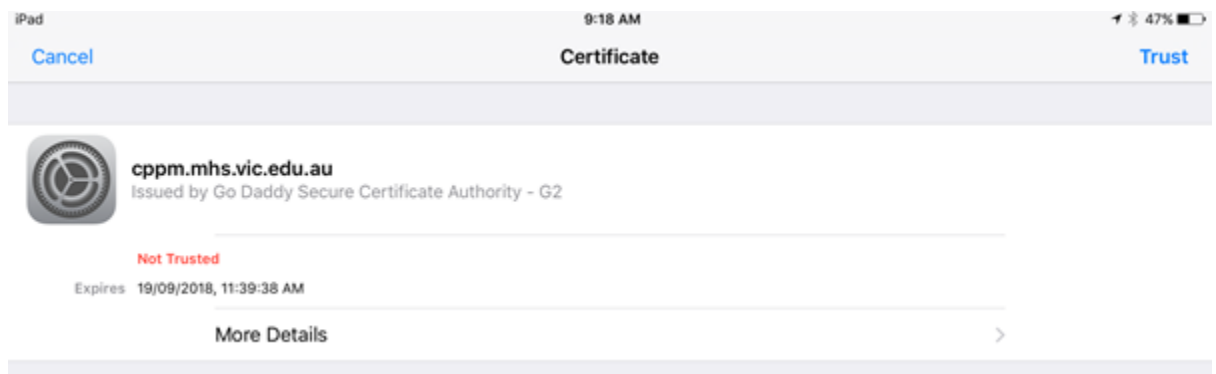

- On the left hand menu, select 'Wi-Fi'. You should see the following screen:

- Select 'EduSTAR'. The following screen will now be displayed. Next to 'Username', enter "userid" which is your student code. The password is your new current Compass / Windows password.

- The following screen will be displayed. Select 'Trust'.

- The following screen will now be displayed showing that you are connected.

- You are now fully connected! You can click the 'Home Page' button and start using your iPad. Enjoy!

3.0 Connect your Windows Device to the new MHS EduSTAR Wi-Fi Network

3.1 Step 1 - Removing the old EduSTAR Wi-Fi network setup

Only perform Step 1, if your windows device had been connected to the old EduSTAR

- Open an administrative command prompt and enter the following command

```
netsh wlan delete profile name="EduSTAR"
```

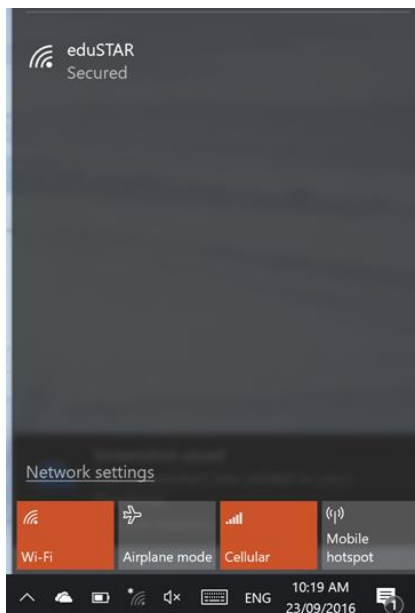

Press Enter

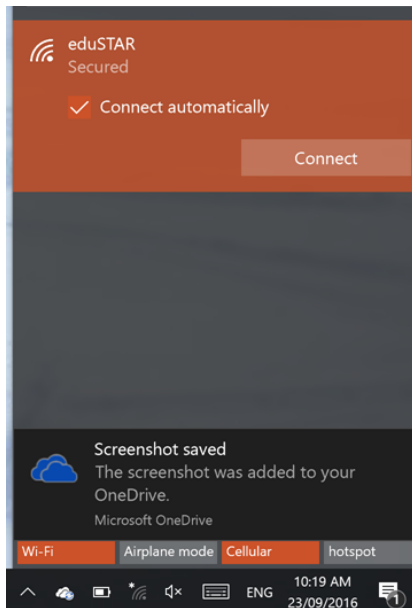

3.2 Step 2 – Connect to the new EduSTAR Wi-Fi network

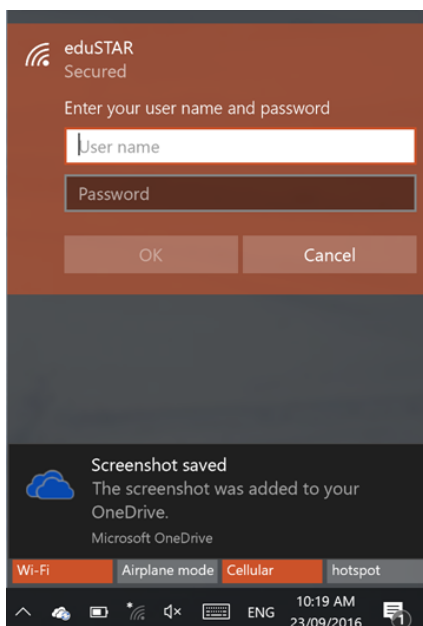

- Click the Wi-Fi Network taskbar icon and bring up the available Networks and click on EduSTAR

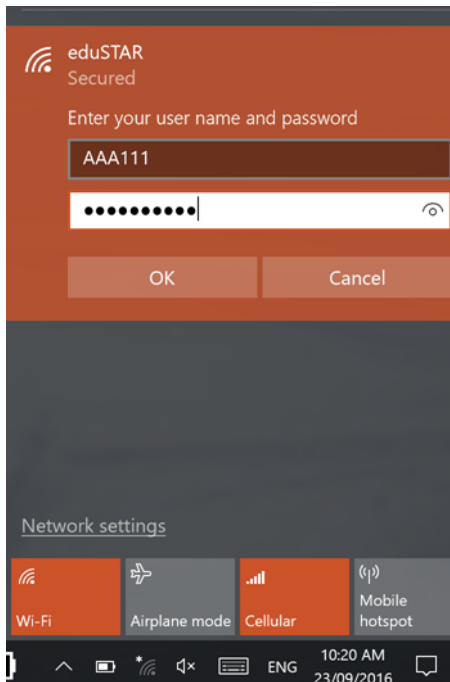

- Click on Connect (Ensure Connect automatically is ticked)

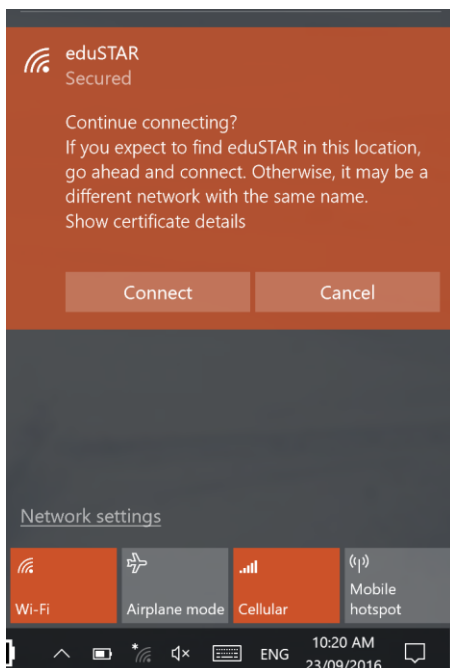

- The Wi-Fi Logon Screen appears

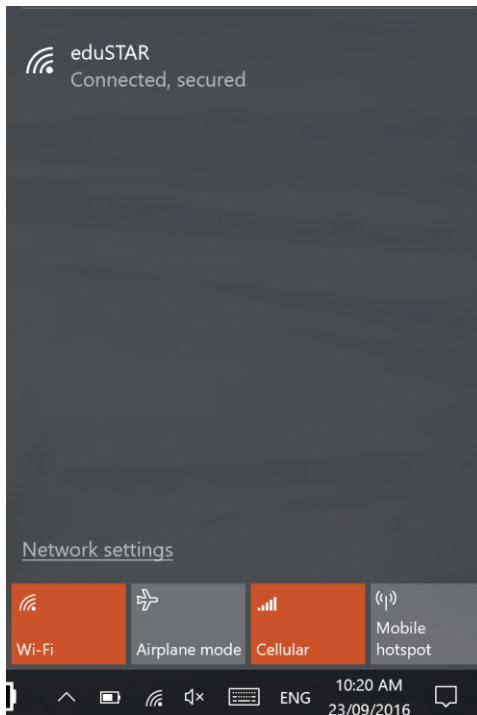

- Enter your Student ID and Windows / Compass Password

- Click Connect

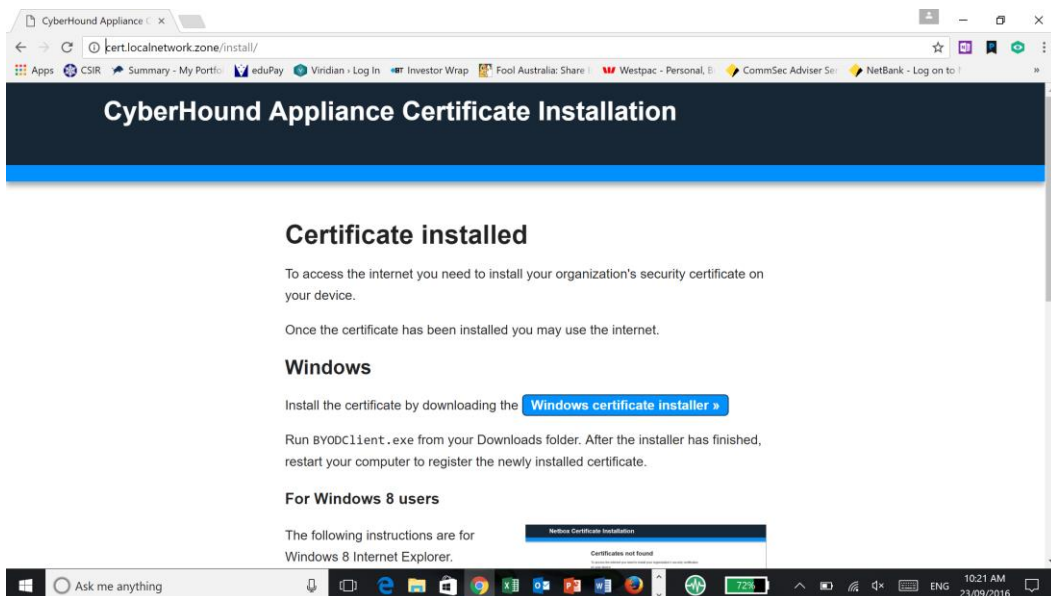

- You are now connected to EduSTAR

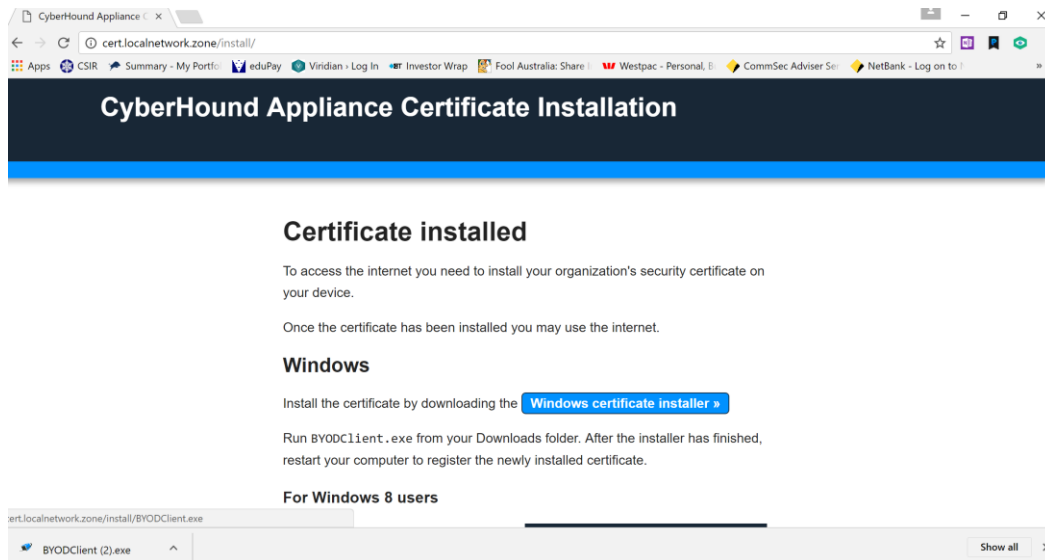

3.3 Step 3 – Optional - First time connection to the Internet

This step is only required if you have **NOT** had your device connected to the MHS EduSTAR before. Open a browser and attempt to go to the internet. It should bring up the following screen

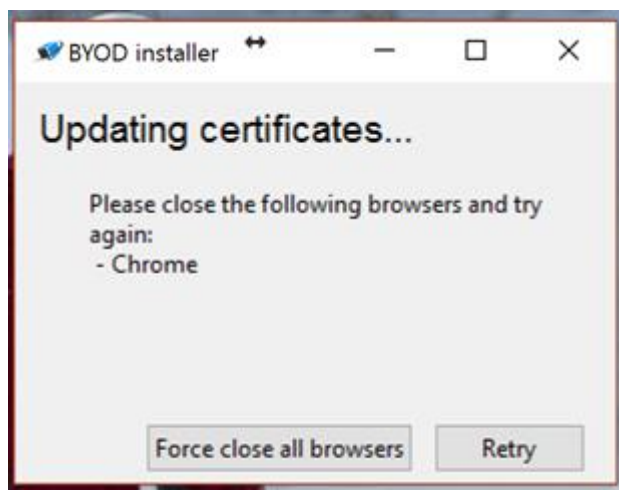

- Click the Windows Certificate Installer button to download the BYOD client

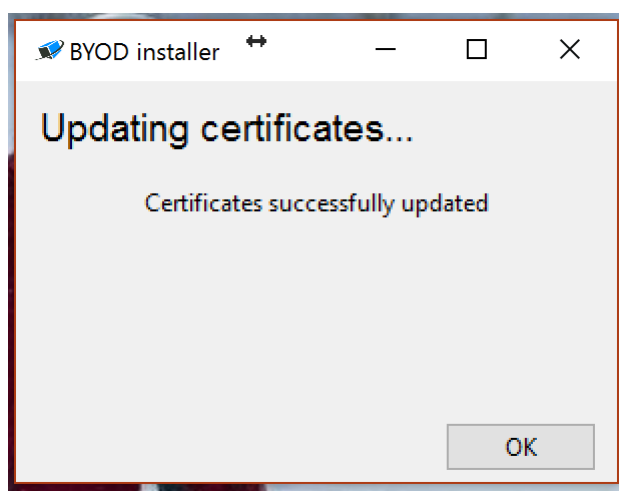

- Click the downloaded Installer – BYODclient.exe to launch the certificate installer

- Click Force close of all browsers

- The certificates should now be installed. Click OK

- Your windows Device is now good to go.

4.0 Section 3 – Connecting your Mac to EduSTAR WiFi

- When Prompted Update your existing WiFi Connection certificate by entering your Mac Admin UserID and password and click OK. (yes that is all there is)
- You are now connected to Edustar
